

From digital mess to scalable operations

Partnership that makes the difference

Most digital risks start in the gaps:

Weak architecture

Good products slow down
on unstable foundations.

+

Fragmented systems

No shared flow → more manual
work, more gaps.

+

Broken ownership

Too many handoffs.
No one owns the full flow.

So software problems have not only tech roots →

Technology only works when the foundation is right

- ✘ more tools do not fix weak architecture
- ✘ more dashboards do not create shared visibility
- ✘ more automation does not solve unstable workflows

AI on top of chaos usually amplifies it

Architecture, ownership, and delivery have to work together →

What makes West Solutions delivery different?

✓ Full ownership

One team accountable end to end

✓ Proactive mindset

We spot issues early and act before they grow

✓ Mature delivery

Less ambiguity, better coordination, faster flow

✓ Execution you can trust

Reliable delivery, even in complex settings

This is where technical expertise meets operational clarity →

Proven delivery in regulated environments

Complex ecosystems

Products with many stakeholders, systems, and constraints.

Defense & GovTech

Deep experience in sectors where confidentiality, auditability, and trust are non-negotiable.

GDPR + ISO 27001

Compliance is integrated into the workflow, not treated as an afterthought.

Production resilience

Stable releases for high-stakes systems.

We speak the language of governance, security, and predictability →

How we take pressure off your team

What we do

Full cycle product work

Project management with real ownership

Consulting that brings clarity

Reliable day-to-day support

Why it matters for you

Design and development move in one direction

Better alignment, faster decisions, less delivery hassle

You see the right next move before time is wasted

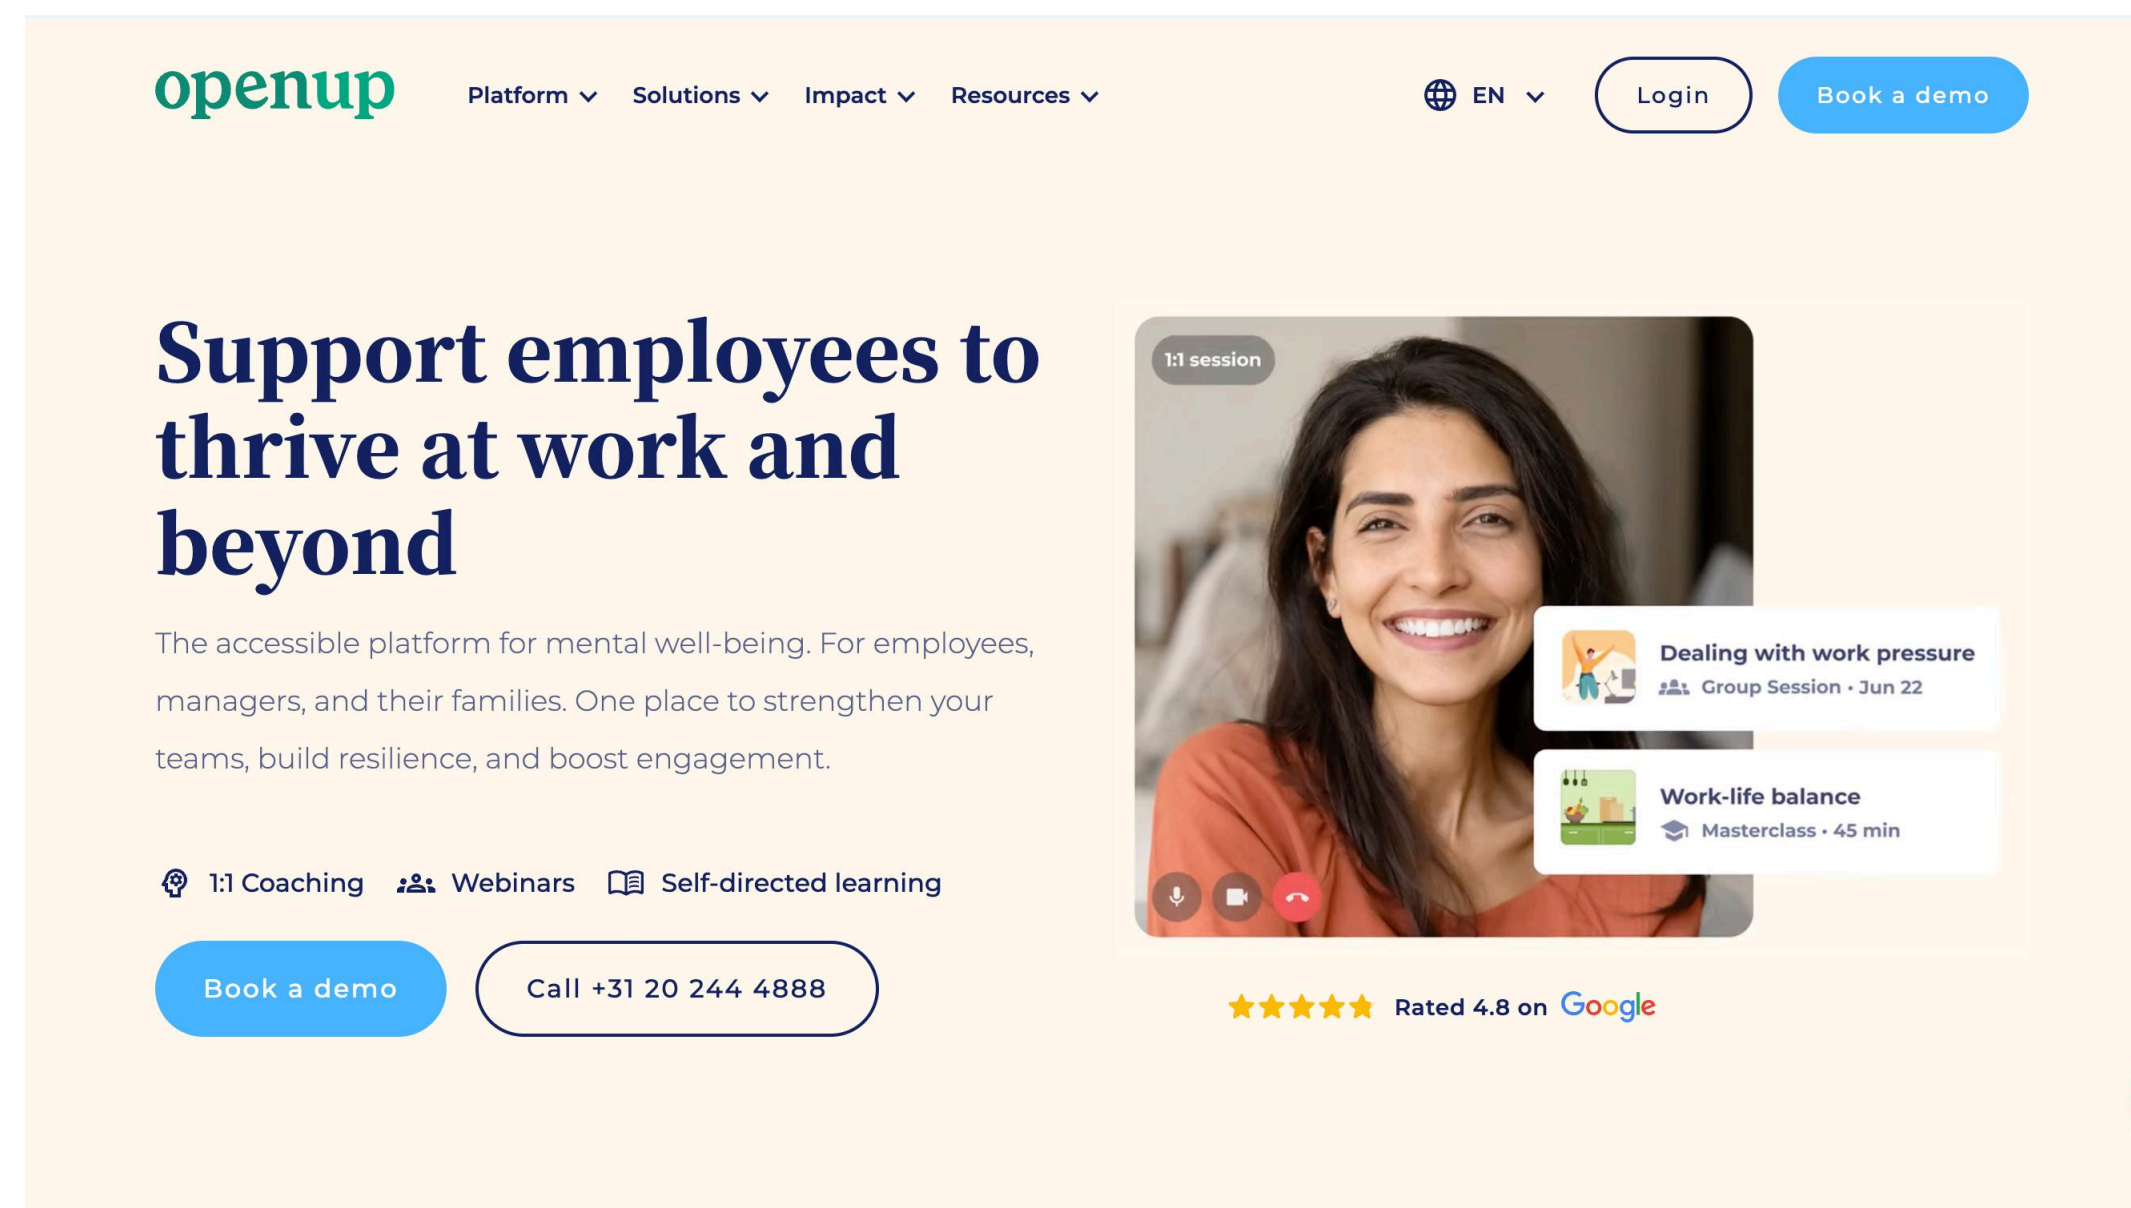

Your team carries less delivery headache

We handle the complexity, so you can focus on the business →

Strategic partnerships under formal governance

Trust is built through long-term performance.

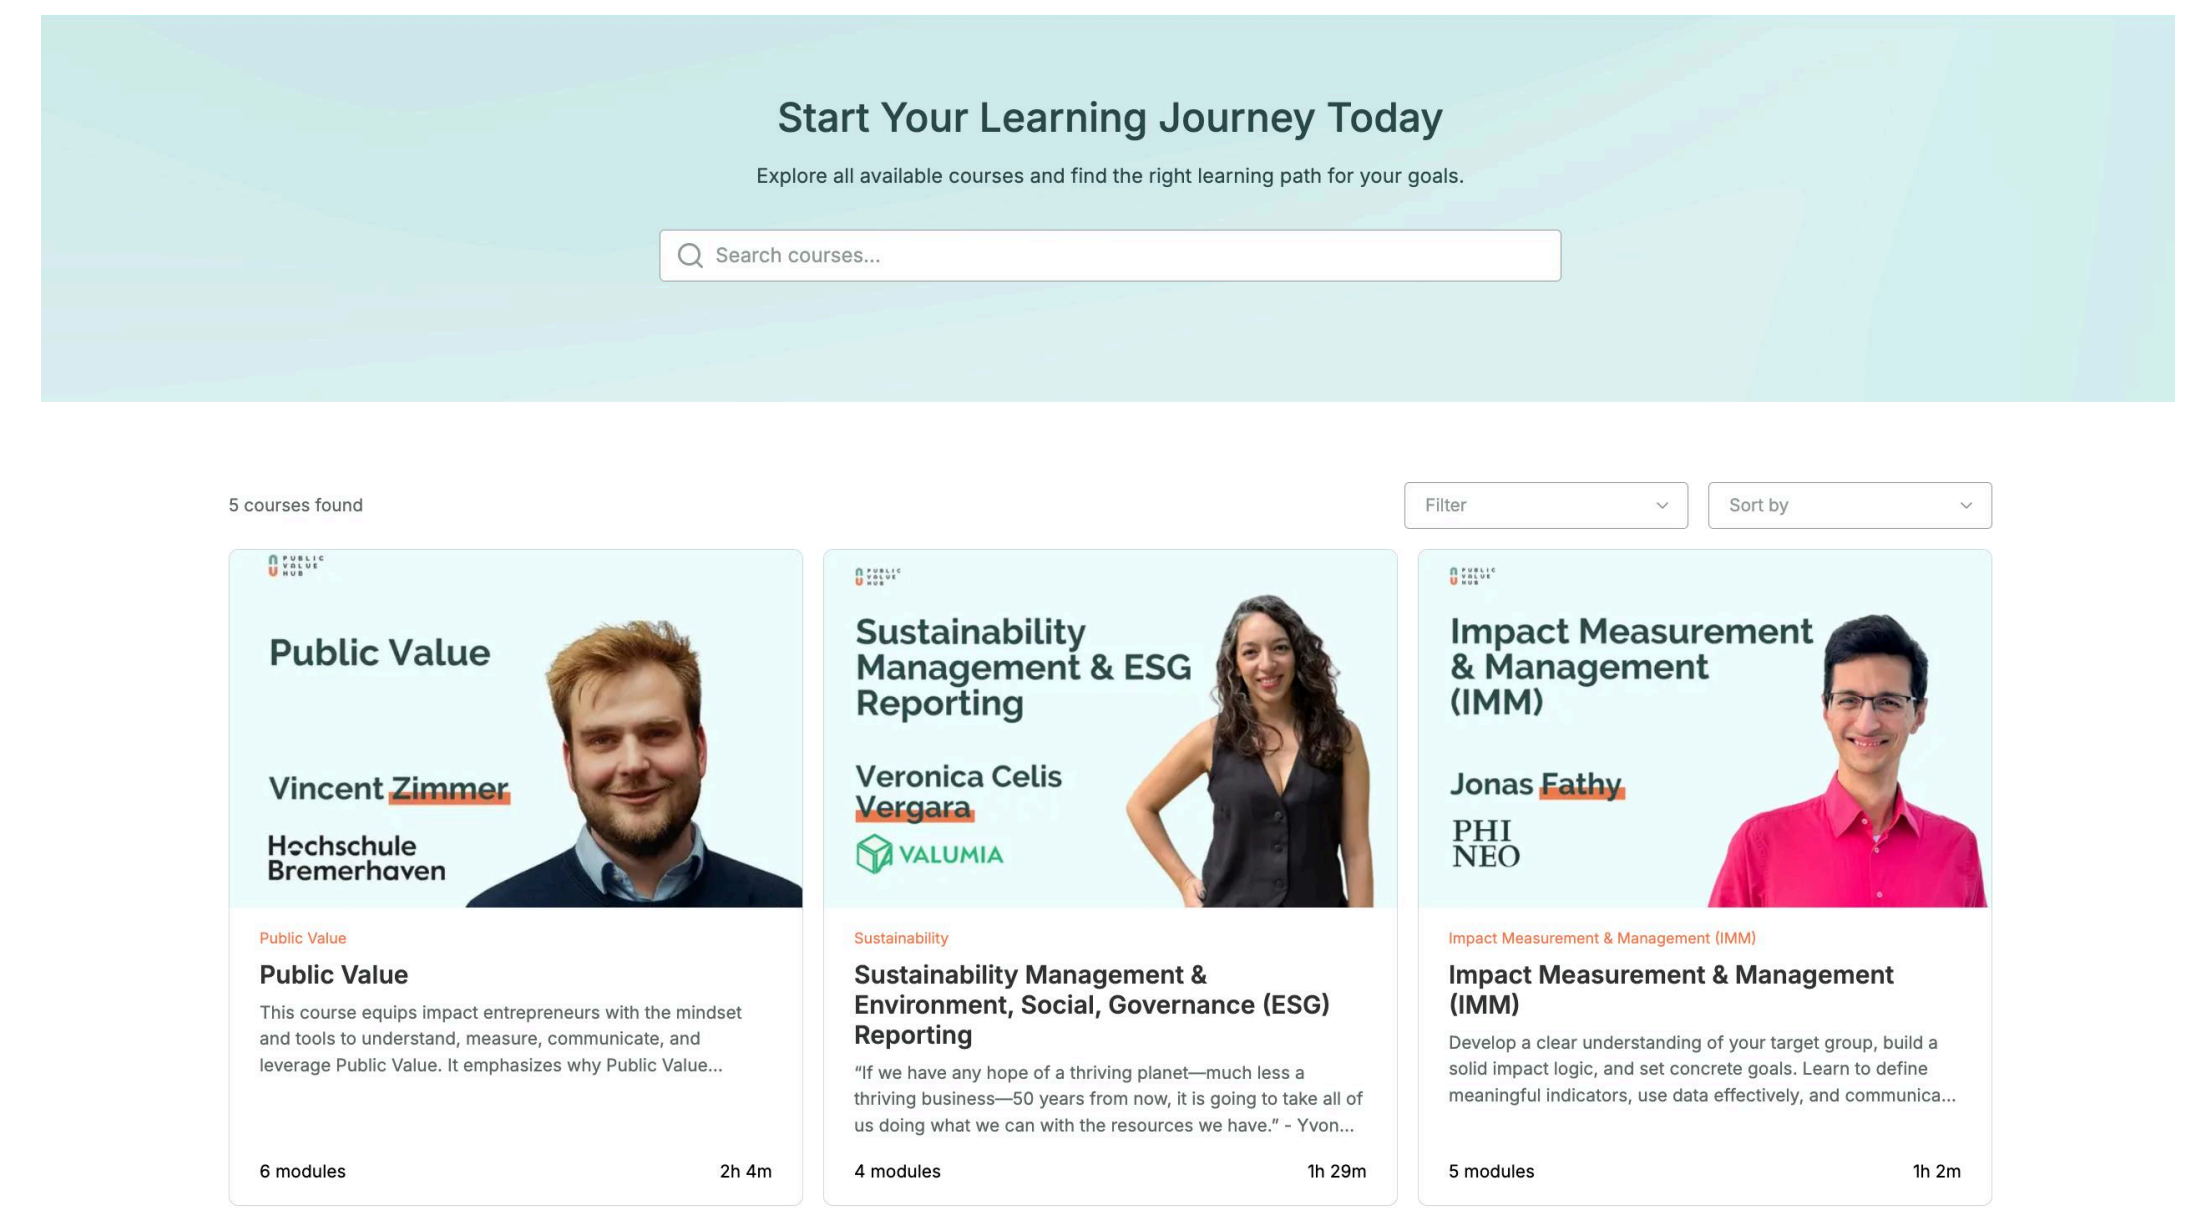

The screenshot shows the OpenUp website interface. At the top, there is a navigation bar with the 'openup' logo and menu items: Platform, Solutions, Impact, and Resources. There are also 'Login' and 'Book a demo' buttons. The main content area features a large heading 'Support employees to thrive at work and beyond' and a sub-heading 'The accessible platform for mental well-being. For employees, managers, and their families. One place to strengthen your teams, build resilience, and boost engagement.' Below this, there are icons for '1:1 Coaching', 'Webinars', and 'Self-directed learning'. A prominent 'Book a demo' button and a phone number '+31 20 244 4888' are visible. On the right, a video player shows a woman smiling, with two course thumbnails overlaid: 'Dealing with work pressure' (Group Session - Jun 22) and 'Work-life balance' (Masterclass - 45 min). A star rating of 4.8 on Google is also displayed.

OpenUp (Amsterdam)

Master Services Agreement since 2021. Acting as a technical backbone for **civic tech infrastructure**.

5+ years of continuous delivery.

The screenshot shows the Public Value Academy website. The top section has a heading 'Start Your Learning Journey Today' and a sub-heading 'Explore all available courses and find the right learning path for your goals.' Below this is a search bar with the placeholder text 'Search courses...'. The main content area displays '5 courses found' and a list of three course cards. Each card includes the course title, the instructor's name and photo, the institution, a brief description, and the number of modules and duration. The courses are: 'Public Value' by Vincent Zimmer (Hochschule Bremerhaven), 'Sustainability Management & ESG Reporting' by Veronica Celis Vergara (VALUMIA), and 'Impact Measurement & Management (IMM)' by Jonas Fathy (PHI NEO).

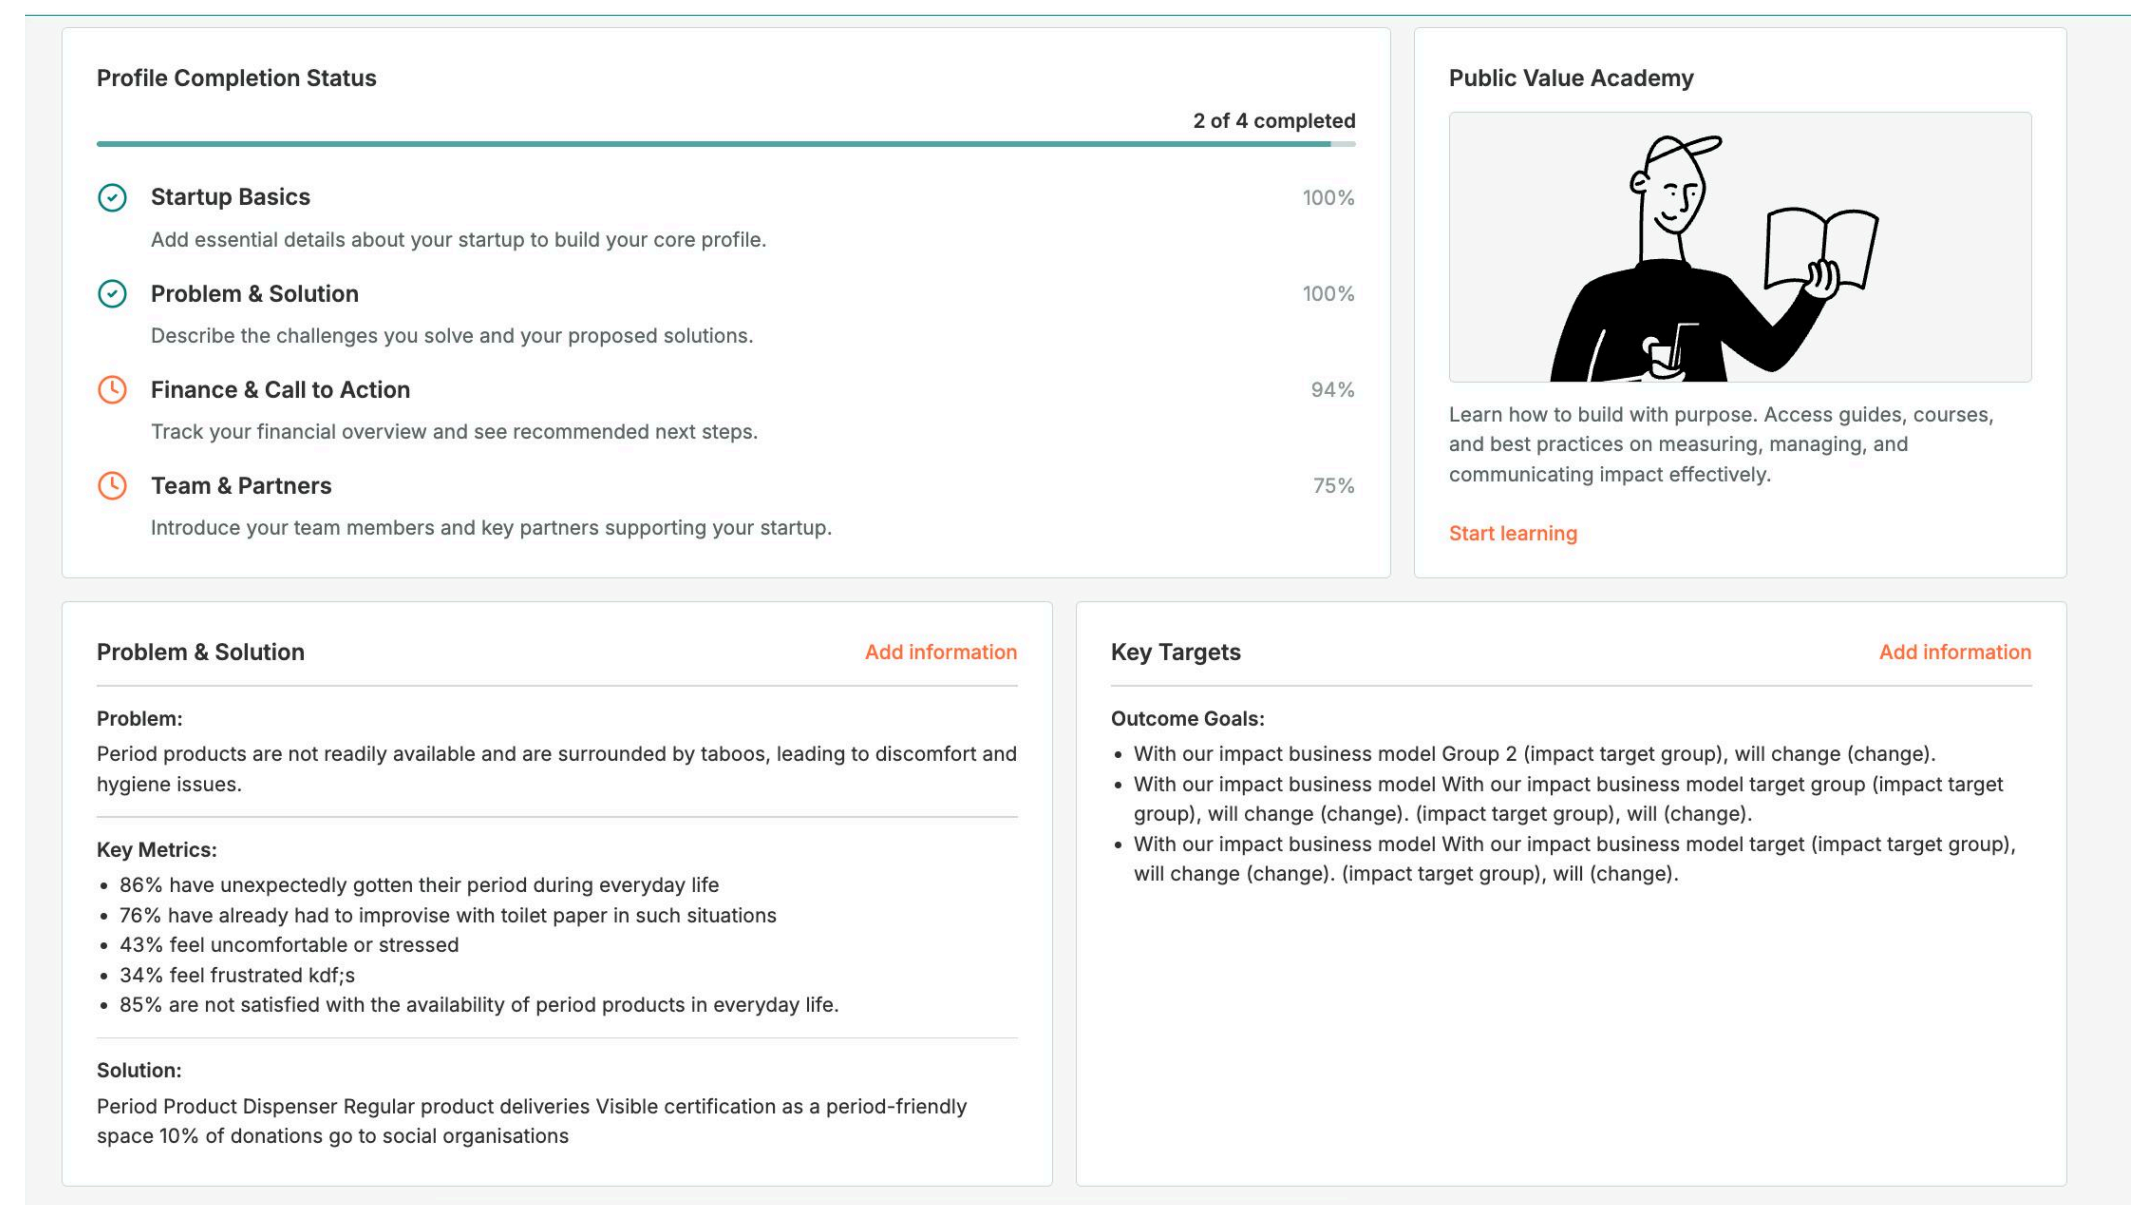

Public Value Academy (Berlin)

Start with technical diagnostic, continue with full partnership

A diagnostic engagement to turn uncertainty
into a roadmap

Week 1 - Audit the baseline

We map your request-to-delivery flow.

Outcome: A clear 1-page operational map

Week 2 - Identify friction

We pinpoint where handoffs and data gaps create
hidden costs.

Outcome: Friction map with priorities

Week 3 - Define the next move

We align ownership, priorities, and technical
direction

Outcome: An investment-ready execution plan.

A simple first step before a bigger commitment →

Let's talk about how we can support your business growth

From product work to delivery support, we help teams move with more clarity and less operational weight.
